+63-955-0390-991

Full-Stack Software Engineer with 4+ years of experience developing web, mobile, AI-powered, GIS, and IoT solutions. Experienced in Laravel, Flutter, PHP, Python, MySQL, and API integrations. Developed systems for government agencies, healthcare, education, e-commerce, and dengue surveillance projects. Passionate about building scalable software products and solving real-world problems through technology.

WORK EXPERIENCE

LABORATORY AIDE (July 2022 to January 2023)

Business Intelligence Research and Development Center (DOST), The center analyzes data and develops apps to help LGUs make confident and appropriate responses in a crisis, in order to become more proactive. It is hoped that through the BIRD-C, our LGUs will become more active in finding solutions and innovations to further improve the lives of the people through the data they analyze.

- Assist in the development of the relevant algorithms, programs and software as required by the Project;
- Assist in Data Processing and Analysis;
- Assist in preparation in technical reports and manuscript for the project; and
- Assist in all phase of Software Development Life Cycle including business requirements review, technical design, coding and unit testing, integrating, testing release documentation, post implementation support.

TECHNICAL AIDE VI (May 2025 to June 30 2026)

DEPARTMENT OF SCIENCE AND TECHNOLOGY (DOST), The Department of Science and Technology is the executive department of the Philippine government responsible for coordinating science and technology-related projects and for formulating policies and programs in these fields to support national development.

- Assist in all phase of Software Development Life Cycle including business review, technical design, coding and unit testing, integrating, testing, release documentation, post implementation support;
- Assist in the conduct and attend to the logistics requirements of roundtable discussions, scientific meeting and similar activities;
- Perform messengerial and similar activities;
- Perform Junior Computer Programming tasks.

PROJECTS

MOBILE APP • *Community Dengue Early Warning System (C-DEWS) 2022-2023*

Developed a dengue surveillance mobile app used by health workers to monitor OLTrap deployments, mosquito egg counts, and outbreak indicators in real time.

WEB APP • Online Voting System - 2025

Developed a secure online voting platform used by Isabela State University – Cauayan Campus for managing student elections and vote tabulation.

WEB APP • EnShopreneur - 2024- 2025

<https://enshopreneur.shop>

Built a multi-vendor e-commerce platform enabling entrepreneurs and small businesses to manage products, orders, and online sales.

WEB APP • Vaccination Management System - 2024

<https://district1-web-healthcare.online>

Reduced manual vaccination tracking through automated scheduling, patient management, and SMS notification features for an RHU.

RASPBERRY PI • Community Dengue Early Warning System (C-DEWS) - 2024-2025

Developed a Raspberry Pi-powered kiosk for OLTrap registration, microscope image capture, and centralized dengue surveillance data collection.

WEB APP • Schedulera - 2025 - 2026

<https://schedulera.online>

Built an hourly hotel booking platform that streamlines room reservations and booking management for accommodation providers.

WEB APP • Synqbox Data Cleaner - 2025

<https://datacleaner.synqbox.com/>

Developed a data cleaning platform that automates dataset transformation, standardization, and preparation for analytics and reporting.

MOBILE APP • Community Dengue Early Warning System OLTrap Mapping (C-DEWS OLTrap Mapping) 2026

Developed a data cleaning platform that automates dataset transformation, standardization, and preparation for analytics and reporting.

WEB APP • TCR Airconditioning - 2026

<https://tcr-airconditioning.com/>

Built a business management system for service requests, quotations, transactions, and operational record management.

PERSONAL PROJECTS

LINKRIDE

- Developing a rider communication platform that enables real-time voice communication between motorcycle riders using wireless headsets and local network connectivity.
- Designing mobile-first interfaces and rider group management features.

VENDORA

- Building a modern Point of Sale (POS) platform that enables businesses to manage sales, inventory, products, customers, and transaction records through a centralized system.
- Designing scalable business management features, analytics dashboards, inventory tracking tools, and responsive user experiences to support efficient retail operations.

ORIN AI

- Developing an AI-powered virtual assistant for conversational support and productivity tasks.
- Exploring AI integration, prompt engineering, and intelligent workflow automation.

TECHNICAL SKILLS

Languages

- PHP, JavaScript, Python, Dart, SQL

Frameworks & Libraries

- Laravel, Livewire, Flutter, Flask, Tailwind CSS, Bootstrap, jQuery

Databases

- MySQL, SQLite, Supabase

Frontend

- HTML5, CSS3, AJAX, DataTables, Chart.js, FullCalendar

Backend & APIs

- REST APIs, JSON APIs, Webhooks, RBAC, API Integration

Mobile Development

- Flutter, Android Development, GPS & Geolocation, Push Notifications, QR Code Integration

Cloud & DevOps

- VPS Deployment, Shared Hosting, Domain & DNS Management

AI & Automation

- OpenAI API, Ollama, LangChain, Prompt Engineering, Speech Recognition, Text-to-Speech

Tools

- Git, GitHub, Composer, Node.js, NPM, Postman, XAMPP, Herd, VS Code

EDUCATION HISTORY

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Isabela State University - Cauayan Campus

#18, Dacanay St. San Fermin Cauayan City, Isabela.

2018-2022

CERTIFICATE AND AWARDS

ON THE JOB TRAINING - BUSINESS INTELLIGENCE RESEARCH AND DEVELOPMENT CENTER (BIRD-C), DOST REGION II (JANUARY - MAY 2022)

- Assisted in the development of software applications, algorithms, and data-driven solutions for LGUs.
- Participated in requirements gathering, technical design, coding, testing, deployment, and documentation.
- Assisted in data processing, analysis, and preparation of technical reports.
- Contributed to research and development projects under the Community Dengue Early Warning System (C-DEWS) initiative.

DIGITAL TWIN TRAINING COURSE FOR CIVIC INNOVATION TWIN TECHNOLOGY (CITTE) UNITED CITIES, ISABELA STATE UNIVERSITY, DOST REGION II

- Certificate of Completion – Digital Twin Training Course for Civic Innovation Twin Technology (CITTE) (2023)

CERTIFICATE OF COMPLETION – DIGITAL TWIN TRAINING COURSE FOR CIVIC INNOVATION TWIN TECHNOLOGY (CITTE) (2023)

- Completed training in Digital Twin concepts, 3D modeling, simulation, and civic innovation technologies.
